Subject: Request for Assignment Extension on Machine Learning and AI/ML

Sir

I am writing to ask if I can get an extension for our assignment on Machine Learning and AI/ML. The original deadline was March 20th. I had a family emergency that I had to take care of so I couldn't focus on the work for a days.

I have already done about half of the draft. I think I can submit a version to you by today, March 25 if you give me some more time.

I appreciate your time and patience with this request. I am happy to provide any documentation you need.

Thank you for considering my request, about the Machine Learning and AI/ML assignment.

Yours Truly

Vaibhav Dewangan

Email-2:

Subject: Application: Summer ML Internship

Sir

My name is Vaibhav Dewangan. I am a student at VIT Bhopal University and I am studying for an Integrated M.Tech in Artificial Intelligence. I will finish my studies in the 2025 batch. I have been looking at the work that Google does in machine learning for a while now. I want to work with the machine learning team at Google as a summer intern.

What I like about Google is that it is not about using big technology but also about finding solutions to real problems that people face. I have learned a lot about Python and how to solve problems through my studies and the projects I have done. Now I want to use these skills in a place like Googles machine learning team, where things move fast and new ideas are welcome.

I have attached my resume, which has all the details about my skills and the projects I have worked on. I would really like to talk about how I can help the machine learning team at Google this summer.

Thank you for taking the time to look at my application for the Summer ML Internship, at Google.

Best regards,

Navya nikhara
