

Digital Portfolio

For this task, I created professional profiles on GitHub, LinkedIn, and Kaggle. GitHub is used to store and manage coding projects, LinkedIn helps in building a professional network, and Kaggle is useful for learning data science and participating in competitions.

I updated my GitHub profile by adding a README that includes my academic details and interests. On LinkedIn, I added my education details and created a basic professional profile. Kaggle was used to explore datasets and learning resources.

These platforms will help me build my skills and showcase my work over the next four years. I plan to regularly update my profiles, upload projects, and connect with professionals to improve my career opportunities. These platforms will help me build my skills and showcase my work over the next four years. I plan to regularly update my profiles, upload projects, and connect with professionals to improve my career opportunities.
